

Activity Report 2018

Ormos Charity is a Canadian registered non-profit organization based in Toronto. It was created in May 2017 to support services and programs for the children, youth and families in the former Soviet Union in the areas of social, education and spiritual development.

In the year 2018, NGO Ormos Charity continued supporting existing programmes and partnerships, as well as developed the new ones.

We continued our work in the Moldovan city of Balti where we have been supporting the Youth Club “Fakel” (“The Torch”). More than 110 children and young adults benefited from the programs offered by the Youth Club and its volunteers in 2018. **The majority of the children and youth are coming from the socially disadvantaged families or other backgrounds.** We wanted these children and young adults feel safe and included in the environment they like.

In the beginning of 2018, we launched the Debate Club with focus on developing speaking, listening and critical thinking skills, growing the ability to organize and skilfully use arguments that will help the youth in their future career and professional life.

In August 2018, we visited the City Employment Agency where youth learned about job market and skills development.

We continued making emphasis on the active lifestyle and sports. In 2018, we began offering volleyball classes in cooperation with one of the local schools. Classes were held throughout the entire year on Saturdays.
